Andrii Shupyk

UI Developer (HTML, CSS, JavaScript)
Finland

Summary

Responsive and adaptive layout, HTML5, Nunjucks templating, CSS3, SCSS, BEM methodology, Flexbox, Bootstrap 5/3, Vanilla JavaScript.

UI animations, complex forms, clean, valid, cross-browser code. I have practical experience integrating markup into Nuxt 2 and C# environments, allowing for effective collaboration with development teams.

Experience

Qela App

UI Developer (HTML, CSS, JavaScript)
December 2024 - Present (1 year 3 months)

Freelance. Layout of the admin panel and mobile web application of Qela. HTML project structure and styles CSS based on Bootstrap 5/3. To build HTML I use the nunjucks template engine. Development of Qela page templates and components. Depending on the design requirements, adding custom components with custom styles.

Project support and communication with the team occurs constantly.

OwlWeb. Team — design & development

UI Developer (HTML, CSS, JavaScript)
May 2022 - November 2024 (2 years 7 months)
Kyiv, Ukraine

Layout of multi-page websites such as online stores and corporate websites, customized in vue2, nuxt.

iStar Design Bureau

UI Developer
October 2023 - May 2024 (8 months)
Kharkov, Kharkov region, Ukraine

Freelancing. The project was created on Bootstrap 5/2. There are also a lot of CSS, JavaScript, GSAP (<https://gsap.com/>) animations in the project. Layout for custom WordPress admin panel.
